
Kaval

Online Case Management Platform

Product Requirements Document

1 Executive Summary

Kaval is a cloud-first case management platform for social work teams managing beneficiary cases, interventions, court sittings, and field visits. Unlike the offline-first version, this platform is always connected — all data is stored centrally in the cloud, enabling real-time collaboration, instant supervisor visibility, live dashboards, and centralized reporting with no manual Excel synchronisation.

The platform is delivered as two integrated surfaces:

- Web Application — for Project Directors, Project Coordinators, and supervisors. Full case management, dashboards, reporting, staff administration, and configuration.
- Mobile App (React Native) — for Social Workers and Case Workers in the field. Case access, visit logging, GPS capture, notes, interventions, court sittings, and travel claims.

All data flows through a secure cloud API. Role-based access control is enforced server-side. There is no Excel synchronisation — changes are saved in real time to the central database and visible to authorised users immediately.

2 Problem Statement

2.1 Coordination Gaps

- Project Coordinators and Directors have no real-time visibility into field activities — they rely on manual Excel exports shared via WhatsApp or email.
- Cases transferred between Social Workers result in information loss and delayed handover.
- Duplicate case registrations occur because staff cannot see what colleagues have already entered.

2.2 Reporting Overhead

-
- Monthly, quarterly, and yearly reports require manual consolidation from multiple Excel files across multiple devices.
 - Travel claim verification and approval is done on paper or via email.
 - Court date reminders and overdue visit alerts require manual tracking.
-

3 Users and Roles

The platform supports five roles. Access is enforced at the API layer — no client-side role-gating is trusted without server verification.

Role	Primary Access	Key Capabilities
Project Director	Full platform access	Approvals, all reports, organisation settings, user management, audit logs
Project Coordinator	Unit-level management	Staff management, conflict resolution, report exports, case oversight
Social Worker	Field operations	Assigned cases, visits, notes, GPS capture, travel claims
Case Worker	Intervention tracking	Assigned cases, interventions, court sittings, notes, reports

4 Scope

4.1 In Scope

- Cloud-hosted case management with real-time data
 - Role-based web application for supervisors and coordinators
 - mobile app for field staff (iOS and Android)
 - User authentication via email/password with OTP 2FA
 - Case lifecycle management — 6 stages with sub-steps
 - Visit scheduling, GPS capture, and Google Maps navigation
 - Intervention tracking with category master data
 - Court sitting management with push notifications
 - Travel allowance with receipt image upload to cloud storage
 - Daily, weekly, monthly, quarterly, and yearly reports
 - Excel and PDF export of reports
 - Audit logging for all data-changing events
 - Push notifications (mobile) and email alerts (web)
-

-
- Staff directory with admin-controlled management
 - Master data (Legends) managed by Project Coordinator via web UI
 - SMS/WhatsApp notifications
 - Native biometric login (standard credential login used instead)
 - Excel file import for sync
 - Public-facing portal for beneficiaries - If possible
 - Third-party integrations (police, court systems)
 - Load/update Government schemes to the system and suggest appropriate schemes to CCLs using AI
 - Generate possible interventions and actions according to age, type of offence and law using AI
 - Kaval Project Details and objectives
 - Budget allocation and expenditure management
 - Information of Police Stations

5 Functional Requirements

5.1 Authentication and Access Control

- Email + password login
- One-time password (OTP) via email for 2FA
- Forced logout on role change or account deactivation
- Password reset via email link
- Admin can force password reset and deactivate accounts

5.2 Case Management

Case lifecycle — 6 stages

1. **Process Initiation:** Locate beneficiary, collect socio-demographic profile
2. **Maintain and Development:** ICP, PMA, Case Study Report, Follow-up, Lifeskill Training, Parent Management Training, Group Work, Community Program
3. **Inter-sectoral Approach:** Legal, Police, Education, Vocational, Psychological/Psychiatric, De-addiction, Material/Financial, Medical support
4. **Rehabilitation:** Community level or institutional level (with institution details)
5. **Reintegration**
6. **Termination/Exclusion:** Termination by Court or exclusion by NGO

Core case fields

- Crime Number (unique), ST Number (unique), Name, Age
 - Parent details, Address, Contact number
 - Studying/working status, Occupation, Education level
-

-
- Type of offence, Classification (Petty/Serious/Heinous)
 - Repeat or first-time offender, Related cases (cross-links)
 - Domicile: Urban/Rural/Coastal/Tribal/Slum
 - Family type: Joint/Nuclear/Single Parent/Others
 - Economic status: APL/BPL
 - History of crime in family, Recidivism tracking
 - Individual Care Plan (ICP), Psychiatric illness (counselling required, attended, court-ordered)
 - Lifeskill training status, Community service status
 - PMA status for heinous cases: Ordered/Scheduled/Completed
 - GPS coordinates (latitude, longitude), landmark, location verified date/by
 - Next visit date, visit count (auto-calculated), notes summary
 - Interventions needed and provided (linked records)

Search and filtering

- Full-text search by crime number, ST number, name, contact, area
- Filters: stage, offence type, classification, assigned staff, overdue status, area/district
- Saved filter presets per user
- Bulk export of filtered results to Excel or PDF

5.3 Visit Scheduling

- Scheduler view: Today, Weekly calendar, Overdue visits
- Visits auto-suggested based on next visit date and GPS proximity (grouping nearby cases on the same day)
- Accept/complete visit — updates visit count on case record in real time
- Reschedule with reason — reason stored and visible to supervisor
- Visit location entry
- Push notification to mobile app: today's visits, overdue visits

5.4 Notes and Activities

- Note types: Visit note, Court sitting note, Intervention note, General follow-up
- Each note linked to a case, with date/time, author, free text, action required, action due date
- File attachments — uploaded to cloud storage, linked to note; access controlled by role
- Notes feed on case detail screen — chronological timeline view

5.5 Interventions Management

- Interventions needed and provided tracked separately per case
 - Fields: type, description, priority (High/Medium/Low), status, provided date, outcome, assigned staff
 - Intervention categories managed in master data by Project Coordinator
 - Overdue intervention alerts sent to assigned Case Worker
-

5.6 Court Sitting Management

- Per case: date/time, court name, purpose, status (Upcoming/Attended/Postponed)
- Notes and outcome recorded per sitting; next court date set on completion
- Court dates appear on the schedule screen for the assigned worker
- Push notification 24 hours before sitting; email alert to Project Coordinator

5.7 Travel Allowance

- Fields: date, staff, linked cases, start point, destination, mode of transport
- Bus fare, auto fare, auto number, other notes, Petrol allowance
- Receipt/ticket image — uploaded to cloud storage; mandatory for bus, auto, petrol allowance claims
- Claim workflow: Draft → Submitted → Approved (Project Director approves)
- Monthly travel totals per staff — visible to supervisor

5.8 Notifications

- Push notifications (mobile): today's visits, overdue visits, due interventions, court sittings, travel claim approval
- Email notifications (web): monthly report due, travel claim status changes, new case assigned, court sitting tomorrow
- In-app notification centre with read/unread state
- Notification preferences configurable per user

5.9 Reports and Dashboards

Dashboard (web — real time)

- Active cases by stage, offence type, area, and staff
- Overdue visits count and list
- Interventions needed vs provided — gauge chart
- Court sittings this week
- Travel claims pending approval
- Case intake trend — last 12 months

Standard reports

- Daily, weekly, monthly, quarterly, yearly work reports
 - Visits planned vs completed, overdue visits
 - Interventions needed vs provided
 - Court sittings scheduled vs attended
 - Case counts by offence type, classification, and area
 - First-time vs repeat cases
 - Staff-wise workload and performance
 - Travel allowance totals with ticket compliance
 - Export to Excel (.xlsx) or PDF — all reports
-

5.10 Master Data (Legends) — Web UI

- Managed via the web admin panel — no Excel import required
 - Offence types: Attempt of Murder, Theft, Hurt, Narcotics/Substances, PDPP, MV Act, POCSO, Others
 - Classification: Petty offences, Serious offences, Heinous offences
 - Intervention categories, Education levels, Occupation types
 - Visit outcomes, Court outcomes, Area/location clusters, Staff designations
 - Police stations
 - Changes take effect immediately for all users — no sync required
-
