1. Introduction

1.1 What is Kaval Online?

Kaval Online is a comprehensive case management platform designed for child protection services, POC SO (Protection of Children from Sexual Offences) case workers, and juvenile justice professionals. It provides end-to-end case lifecycle management, field visit tracking, court management, and reporting — all accessible via web and mobile.

1.2 Who Uses the System?

Role	Description
Director	Top-level administrator. Manages staff, approves budgets and claims, views audit logs, manages user accounts.
Coordinator	Mid-level supervisor. Oversees cases, reviews field worker activities, manages crisis queue.
SocialWorker	Field worker assigned to POC SO cases. Conducts visits, creates interventions, manages court sittings, works offline.

Role	Description
CaseWorker	Field worker with same capabilities as SocialWorker.
Accountant	Manages budgets — creates, proposes, and executes budgets; tracks utilizations.
Vendor	Backstage system role for vendor onboarding and organisation management.

1.3 Supported Platforms

- **Web App:** Chrome, Firefox, Edge (recommended) — <http://localhost:4200>
- **Mobile App:** Android (React Native) — installed via APK
- **API Swagger:** <http://localhost:5049/swagger>

2. Getting Started

2.1 System Requirements

- Modern web browser (Chrome 90+, Edge 90+, Firefox 88+)
- For mobile: Android 8.0+ device with USB debugging enabled
- Google Authenticator (or compatible) app for 2FA

2.2 Accessing the Platform

1. Open your browser to <http://localhost:4200>
2. The login page will appear
3. Sign in with your credentials (provided by your Director)

2.3 First-Time Login

Step 1 — Enter Credentials:

User Type	Email	Password (default)
Director	director@pilot.example	CHANGE_ME
Vendor	karthik.k.82@outlook.com	CHANGE_ME

Step 2 — OTP Verification:

A 6-digit code is sent to your registered email address. Enter the code within 5 minutes.

Step 3 — Set 2FA (Recommended for Directors):

After first login, you will be prompted to set up Two-Factor Authentication:

1. Scan the QR code with Google Authenticator or Authy
2. Enter the 6-digit code from the app
3. On subsequent logins, you'll use the authenticator code instead of email OTP

Step 4 — Change Password:

Navigate to your profile settings to update your password from the default.

3. Login & Authentication

3.1 Standard Login Flow

Email + Password → OTP via Email → Access Granted

1. Enter your registered email and password
2. Check your email inbox for a 6-digit verification code
3. Enter the code on the OTP screen
4. You are now logged in and redirected to the dashboard

Note: OTP codes expire after 5 minutes. Click "Resend Code" if needed.

3.2 Two-Factor Authentication (2FA) — Directors

If you have enrolled in 2FA (recommended):

Email + Password → TOTP Code → Access Granted

1. Enter your email and password
2. Instead of email OTP, you'll be asked for a 6-digit TOTP code
3. Open your authenticator app and enter the current code
4. You are now logged in

To enroll in 2FA:

- Go to **Admin** → **My Profile** → **Enable 2FA**
- Scan the QR code with your authenticator app
- Enter the verification code to confirm

3.3 Password Reset

1. On the login page, click **Forgot Password?**
2. Enter your registered email address
3. Check your email for a password reset link
4. Click the link and enter your new password (minimum 8 characters)
5. Log in with your new password

3.4 Session Management

- Access tokens expire after **15 minutes**
- Refresh tokens expire after **7 days**
- You'll be automatically logged out after prolonged inactivity
- Log out manually using the profile menu

3.5 Step-Up Authentication (Field Workers)

When revealing personally identifiable information (PII) for a case:

1. Click **Reveal PII** on a case detail page
 2. A step-up OTP will be sent to your email
 3. Enter the code to temporarily authorize PII access
-

4. Dashboard

4.1 Director / Coordinator Dashboard

The dashboard provides a real-time overview of your organisation's operations:

- **Crisis Queue:** Prioritized list of high-risk cases requiring immediate attention
- **Case Overview:** Total cases by stage, new cases this week, overdue items
- **Visit Metrics:** Today's scheduled visits, completion rate, overdue visits
- **Budget Snapshot:** Budget utilization summary, pending approvals
- **Travel Claims:** Pending claim approvals, monthly totals
- **Recent Activity:** Latest case updates, notes, and interventions

4.2 Field Worker Dashboard

- **My Assigned Cases:** List of cases assigned to you
 - **Today's Visits:** Scheduled visits for the day with grouping suggestions
 - **Weekly Schedule:** Full week view of all visits
 - **Overdue Items:** Visits and interventions past their due date
 - **Upcoming Court:** Court sittings scheduled for your cases
-

5. Case Management

5.1 Case Lifecycle

A case progresses through these stages:

Process Initiation → Preliminary Assessment → Social Investigation →
Community Based Intervention → Placement → Reintegration → Termination/Exclusion

Each stage has its own data collection form capturing stage-specific information.

5.2 Creating a New Case

Who can create cases: Directors, Coordinators

1. Navigate to **Cases** → **Create New Case**
2. Fill in required fields:

Field	Description
Crime Number	Unique case identifier from police records
ST Number	Sessions Trial number
Beneficiary Name	Child's name (encrypted at rest)
Beneficiary Age	Age of the child
Type of Offence	Classification of the offence
Offence Classification	Heinous, Serious, or Petty
Domicile	Urban or Rural
Is First-Time Offender	Yes/No

3. Click **Save**. The case is created with current stage set to **ProcessInitiation**
4. Assign the case to a field worker

5.3 Searching for Cases

1. Go to **Cases** → **Case Registry**
2. Use the search panel to filter by:
 - Crime number, ST number
 - Beneficiary name
 - Current stage
 - Assigned worker
 - Date range
 - Offence type, classification
 - Domicile
3. Results can be **exported to Excel or PDF**

5.4 Transferring a Case

1. Open the case detail page
2. Click **Transfer**
3. Select the new assigned worker
4. (Optional) Add a transfer note
5. Confirm the transfer

5.5 Merging Duplicate Cases

If duplicate cases are detected:

1. Open either case
2. Click **Merge Duplicates**
3. Select the target case to merge into
4. Choose which data to keep from each case
5. Confirm — the duplicate case is deactivated

5.6 Stage Transitions

1. On the case detail page, locate the **Stage** section
2. Click **Transition Stage**
3. Select the target stage (must follow the defined order)
4. Add any transition notes
5. Confirm — the stage is updated and the event is logged

5.7 Checking for Duplicates

Before creating a new case, use the **Check Duplicate** feature:

1. Go to **Cases** → **Check Duplicate**
2. Enter crime number/ST number
3. The system checks for existing matches and warns you

5.8 GPS Verification (Mobile)

When visiting a case location:

1. Open the case on the mobile app
2. Tap **Verify GPS**
3. The app captures current coordinates (latitude, longitude)
4. Coordinates are stored for audit trail

5.9 PII Reveal (Step-Up)

Protected personal data includes beneficiary name, contact, landmark:

1. Click **Reveal PII** on case detail
2. A step-up OTP is sent to your email
3. Enter the code to temporarily view the data
4. The session authorizes PII view for a limited time

5.10 GDPR — Data Erasure & Portability

Directors only:

- **Export PII:** Download all personal data for a case as JSON
 - **Erase PII:** Irreversibly remove personal data for a case
-

6. Visits & Field Operations

6.1 Scheduling a Visit

1. Open a case → **Visits** tab
2. Click **Schedule Visit**
3. Select the visit date/time
4. (Optional) Add visit notes
5. The visit appears on the worker's dashboard

6.2 Starting a Visit

1. From dashboard or visit list, tap **Start Visit**
2. The visit status changes to "In Progress"
3. Record time, observations, photos (mobile)

6.3 Completing a Visit

1. Fill in the visit report:
 - Observations
 - Child's wellbeing status
 - Home environment assessment
 - Follow-up actions required
2. Tap **Complete Visit**
3. The visit is logged with timestamp

6.4 Rescheduling a Visit

1. Open the visit details
2. Click **Reschedule**
3. Select new date and time
4. Provide a reason for rescheduling

6.5 Visit Grouping (Mobile)

For efficient route planning:

1. On the mobile app, view **Today's Visits**
2. Tap **Grouping Suggestion**
3. The app suggests visits to group based on proximity
4. Follow the suggested route for optimal efficiency

6.6 Offline Mode (Mobile)

The mobile app supports offline operation:

1. **Sync data** while connected
2. Work offline — visits, notes, GPS capture all work
3. When reconnected, tap **Push Sync**
4. All offline data is uploaded to the server

7. Case Notes & Interventions

7.1 Creating Case Notes

1. Open a case → **Notes** tab
2. Click **Add Note**
3. Enter the note content
4. (Optional) Mark as internal or visible to all

5. Save — notes appear in chronological order

7.2 Attachments

1. Click **Attach File** on a note or case
2. Select a file (PDF, image, document)
3. File uploads to secure storage (Azure Blob)
4. A download link is generated with time-limited access

7.3 Creating Interventions

1. Open a case → **Interventions** tab
2. Click **Create Intervention**
3. Fill in:
 - Intervention type (counselling, training, referral, etc.)
 - Provider name
 - Notes
 - Provided status (completed or pending)
4. Save

7.4 Overdue Interventions

The system monitors intervention schedules:

- Overdue interventions appear on the dashboard
 - Directors receive automated alerts for overdue items
 - Escalation triggers after defined thresholds
-

8. Court Management

8.1 Scheduling a Court Sitting

1. Open a case → **Court Sittings** tab
2. Click **Schedule Court Sitting**
3. Enter:
 - Court date and time
 - Court name/location
 - Judge name
 - Case outcome (if known)
4. Save

8.2 Upcoming Court Sittings

Your upcoming court dates appear on:

- Dashboard court widget
- **Court Sittings** page with filter options
- Mobile app notifications (24 hours before)

8.3 Reminders & Escalations

- **24-hour reminder:** Automatic SMS/email reminder before the sitting
- **Missed court:** If a sitting is missed, escalation process triggers
- **Crisis queue:** Repeated missed court appearances escalate to crisis

8.4 Court Outcome Recording

1. Open the court sitting
 2. Update with the outcome:
 - Case disposed
 - Adjourned
 - Other
 3. Add judge's remarks
 4. System logs the update
-

9. Travel Claims

9.1 Creating a Travel Claim

Field workers can submit travel claims for work-related travel:

1. Go to **Travel** → **New Claim**
2. Enter claim details:
 - Date of travel
 - From/To locations
 - Purpose (visit, court, training)
 - Mode of transport
 - Amount
3. Attach receipt images (captured via mobile)
4. Save as Draft or Submit

9.2 Submitting a Claim

1. Complete all required fields
2. Click **Submit for Approval**
3. The claim enters the Director's approval queue
4. Status changes to "Pending Approval"

9.3 Approving/Returning Claims (Director)

1. Go to **Travel** → **Pending Approvals**
2. Review claim details and receipts
3. **Approve:** Claim is marked approved, worker notified
4. **Return:** Add a comment explaining why, worker can edit and resubmit

9.4 Monthly Totals

Directors and Coordinators can view monthly travel claim totals:

1. Go to **Travel** → **Monthly Totals**
2. View summarized amounts by worker
3. Export for record-keeping

10. Budget Management

10.1 Budget Lifecycle

Draft → Proposed → Approved → Executed

Stage	Done By	Description
Draft	Accountant	Initial budget creation
Proposed	Accountant	Submit for Director review
Approved	Director	Budget is authorized
Executed	Accountant	Budget is active and utilizable

10.2 Creating a Budget

1. Go to **Budgets** → **Create Budget**
2. Fill in:
 - Financial year (start/end dates)
 - Source of funds
 - Budget line items with allocated amounts
3. Save as Draft

10.3 Proposing a Budget

1. Open the draft budget
2. Click **Propose**
3. Budget enters review queue for Director

10.4 Approving a Budget (Director)

1. Go to **Budgets** → **Pending Approval**
2. Review line items and amounts
3. **Approve** or **Return** with comment

10.5 Tracking Utilization

1. Open an executed budget
2. View **Utilizations** tab for:
 - Each line item's allocated vs utilized amounts
 - Individual utilization entries with dates and descriptions
 - Running balance per budget head

10.6 Budget Reports

1. Go to **Budgets** → **Reports**
 2. View consolidated budget report
 3. Export to Excel for offline review
-

11. Staff & User Management

11.1 Viewing Staff Directory (Director)

1. Go to **Admin** → **Staff Directory**
2. View all staff members in your organisation
3. Filter by role, status, or name

11.2 Adding Staff Members

1. Click **Add Staff Member**
2. Fill in:
 - Name, email
 - Role (SocialWorker, CaseWorker, Coordinator, Accountant)
 - Phone number
3. System sends an invitation email with setup instructions

11.3 Suspending/Reactivating Users

1. Open user profile
2. Click **Suspend** — user cannot log in
3. To restore access, click **Reactivate**

11.4 Resetting User 2FA (Director)

If a user loses access to their authenticator app:

1. Open user profile
2. Click **Reset 2FA**
3. User's 2FA enrollment is cleared
4. User can re-enroll on next login

11.5 Force Password Reset

1. Open user profile
2. Click **Force Reset**
3. User receives a password reset email
4. Current session is invalidated

11.6 Sending Invitations (Director with 2FA)

1. Go to **Admin** → **Invitations**
2. Click **Send Invitation**

3. Enter email and role
 4. System sends an invitation link
 5. Recipient creates their account via the link
-

12. Reports & Exports

12.1 Available Reports

Report	Access	Format
Case Search Export	Coordinator+	Excel, PDF
Socio-Demographic Profile	Coordinator+	Excel
Budget Report	Director	Excel
Crisis Queue	Coordinator+	Web
Audit Log	Director only	Web (paginated)
Travel Claim Totals	Coordinator+	Web

12.2 Exporting Case Search Results

1. Perform a case search with your desired filters
2. Click **Export**
3. Choose format (Excel or PDF)
4. Download the generated file

12.3 Socio-Demographic Report

Generate a socio-demographic profile report:

1. Go to **Reports** → **Socio-Demographic Profile**
2. Report is generated as Excel
3. Contains aggregated data on beneficiary demographics

12.4 Audit Log

Directors can view all system activity:

1. Go to **Admin** → **Audit Log**
 2. Filter by:
 - Date range
 - Event type (login, case create, visit, etc.)
 - User
 3. Paginated results with timestamp and actor details
-

13. Notifications

13.1 In-App Notifications

The bell icon in the header shows:

- Unread notification count
- Click to expand the notification list
- Notifications for: case assignments, visit reminders, claim approvals, system alerts

13.2 Push Notifications (Mobile)

When the mobile app is installed and push tokens registered:

- **Visit reminders** — 24 hours before scheduled visit
- **Court reminders** — 24 hours before court sitting
- **Intervention overdue** — alert for past-due interventions
- **Claim updates** — approval/rejection notifications
- **Crisis alerts** — urgent notifications for escalated cases

13.3 Email Notifications

System sends emails for:

- OTP verification codes
- Password reset links
- Welcome emails for new users
- Court sitting reminders
- Travel claim status updates

13.4 Notification Preferences

1. Go to **Settings** → **Notification Preferences**
 2. Toggle notification types on/off
 3. Preferences sync across devices
-

14. Vendor Portal

14.1 What is Vendor Access?

The Vendor role provides backstage access for managing organisations and the activation flow. It is used by system administrators for:

- Creating new organisations
- Managing activation tokens
- Generating activation links for Directors

14.2 Vendor Endpoints (via Swagger UI)

Vendor operations are API-only (no web UI). Access via Swagger:

1. Open <http://localhost:5049/swagger>
2. Authorize with your vendor JWT token
3. Use the Organisations and Admin endpoints

14.3 2FA Requirement

All vendor API operations require Two-Factor Authentication enrollment. To enroll:

1. Login via Swagger UI
 2. Call `POST /api/v1/auth/enroll-2fa`
 3. Scan the provisioning URI with your authenticator app
 4. Call `POST /api/v1/auth/verify-enroll-2fa` with the code
 5. You can now access vendor-protected endpoints
-

15. Mobile App Guide

15.1 Installation

For development builds:

1. Ensure USB debugging is enabled on your Android device
2. Connect the device via USB
3. Run: `npx react-native run-android`
4. The app installs and launches automatically

15.2 Setting Up USB Connection

1. Enable **Developer Options** on your Android device
2. Enable **USB Debugging**
3. Connect via USB cable
4. When prompted, **Allow USB debugging** on the device
5. Run: `adb reverse tcp:5049 tcp:5049` (API proxy)
6. The mobile app can now communicate with the API

15.3 App Navigation

- **Bottom tabs:** Dashboard, Cases, Visits, More
- **Dashboard tab:** Today's visits, weekly schedule, overdue items
- **Cases tab:** Your assigned cases list
- **Visits tab:** Visit management, grouping suggestions
- **More tab:** Profile, settings, sync status

15.4 Offline Sync

The mobile app supports offline-first operations:

1. Ensure you sync before going offline
2. Work normally — visits, GPS, notes all work offline
3. When back online, the app auto-syncs
4. Check sync status in the More tab

15.5 Discreet Mode (POCSO)

For sensitive field operations:

1. Enable **Discreet Mode** in settings
2. The app icon changes to a neutral icon
3. Notification previews are hidden
4. Quick-exit button (tapping exits app immediately)

16. Troubleshooting

16.1 Login Issues

Problem	Solution
"Invalid email or password"	Check caps lock. Reset password via Forgot Password link.
OTP not received	Check spam folder. Wait 30 seconds, click Resend.
"Account suspended"	Contact your Director.
"Contact your coordinator"	Your account has been deactivated.
"Token version mismatch"	Your session was revoked (password change, 2FA reset). Log in again.

16.2 API Not Responding (Web)

1. Check that Docker containers are running: `docker ps`
2. Check API is running: open `http://localhost:5049/swagger`
3. If not, run `scripts\start-api.bat`
4. Check console for error messages

16.3 API Not Responding (Mobile)

1. Ensure ADB reverse proxy is set: `adb reverse tcp:5049 tcp:5049`
2. Confirm API is running on your computer
3. Reconnect USB cable

16.4 "Two-Factor Authentication Required"

You attempted an action that requires 2FA enrollment:

1. Log in to the web app
2. Go to **Admin** → **Enable 2FA**
3. Follow the setup instructions
4. Retry the action

16.5 Page Not Loading / Blank Screen

1. Check browser console for errors (F12)
2. Ensure the API is running
3. Clear browser cache and reload
4. Check CSP violations in browser console

17. Glossary

Term	Definition
POCSO	Protection of Children from Sexual Offences Act
OTP	One-Time Password — 6-digit code sent via email
TOTP	Time-based One-Time Password — 6-digit code from authenticator app
2FA	Two-Factor Authentication — second layer of security
JWT	JSON Web Token — used for API authentication
ST Number	Sessions Trial number assigned by the court
GPS	Global Positioning System — for visit location verification
PII	Personally Identifiable Information
SAS	Shared Access Signature — time-limited URL for file access
RBAC	Role-Based Access Control — permission system by roles
CSP	Content Security Policy — security headers for web app
Stage	Current phase in the case lifecycle (1-6)
Crisis Queue	Prioritized list of cases needing urgent attention
Hangfire	Background job processing library for scheduled tasks
Azurite	Local Azure Blob Storage emulator for development
